

LYMPHEZE

lymphoedemasc.com.au

EASY TO USE WITH
GREAT OUTCOMES

The Lymphenze arm and leg sleeve enhances the treatment provided by a pneumatic compression pump.

It enables more effective movement of excess fluid out of the affected limb.

Using a Lymphenze arm or leg sleeve under the pump garment helps to:

- Assists with fibrosis reduction
- Significantly reduce oedema (swelling) in lymphoedema associated with chronic venous insufficiency (CVI) as well as surgery/trauma.
- Significantly reduce oedema (swelling) in cancer-associated lymphoedema.

Care instructions: Gentle machine wash in cold water.
